PROJECTS

"Eatable" is an application for restaurants. It has a product dashboard and lets the user create and edit the dishes names, prices, description and images. The project is based on React with the concepts of fetching, components, navbars, libraries, etc.

"Tweetable" is an application similar to twitter that allows the user to create an account, sign up, publish comments and like tweets or comments. It uses Ruby on Rails with the concepts of APIs, authentication, associations, validations, seeds, etc.

"Doable" is an application similar to Google Agenda. The user can create an account, login, add an activity, mark it as "important" or "done" and filter them according to importance or completion. It is based on JavaScript and the concepts of functions, DOM & Events, listeners, async programming, fetch, etc.
